

REMIN

SOIL AND COMPOST REMINERALISER

VOLCANIC ROCK DUST

Best Retail Product or Service **FOUR OAKS TRADE SHOW 2015**

adds essential **MINERALS AND TRACE ELEMENTS** to help grow healthy plants, invigorate composting and as a tonic for wormeries.

SECRETS OF SOIL REMINERALISATION

- **IN DECLINE:** MINERALS and TRACE ELEMENTS are the smallest of soil and compost's five components. They make up a tiny percentage of each harvest yet most plant foods only replace a few of these, in limited amounts. The MINERALS and TRACE ELEMENTS in our food are well documented as being in decline.

- **VOLCANIC FERTILITY:** Volcanic soil, ie soil close to a volcano, is often very fertile. This is because of the rich supply of MINERALS and TRACE ELEMENTS in the volcanic rock. Over millennia it is ground down and spread by glaciers. Adding REMIN volcanic rock dust is like DIY glaciation ie it puts natural goodness back into the soil.

- **LIVING ORGANISMS:** This is soil's second smallest component. In 350BC when Aristotle told us "worms are the intestines of soil" he knew what he was talking about. Instead of boosting, many synthetic fertilisers damage the soil's incredibly abundant and varied living organisms.

the intestines of soil" he knew what he was talking about. Instead of boosting, many synthetic fertilisers damage the soil's incredibly abundant and varied living organisms.

- **WORKING TOGETHER:** Adding REMIN volcanic rock dust to a wormery soon shows the worms love it! In the same way it energises the living organisms of the soil and compost and helps them break down the MINERALS and TRACE ELEMENTS both in the REMIN volcanic rock dust itself and those already inherent in soil.

- **GIVE IT A GO!:** Science continues to research soil biodiversity and MINERAL and TRACE ELEMENT interactions. Meanwhile REMIN volcanic rock dust is organically approved and our well satisfied gardeners are growing (in more ways than one!) all the time... The only way to find out for real, is to try it for yourself!

Gardeners find volcanic rock dust improves health, yield, vigour, flavour and pest resistance for **VEGETABLES, FLOWERS, FRUIT, GRASS, YOUNG TREES.**

Beneficial for **COMPOST** and **WORMERIES.**

REMIN volcanic rock dust

contains the following naturally occurring

MACRO NUTRIENTS			MICRO NUTRIENTS			
(Na) Sodium	(P) Phosphorous	(K) Potassium	(Fe) Iron	(Mn) Manganese	(Cr) Chromium	
(Mg) Magnesium	(Ca) Calcium	(S) Sulphur	(Cu) Copper	(Mo) Molybdenum	(Se) Selenium	
(Cl) Chlorine	MACRO ELEMENT: (Si) Silicon		(Z) Zinc	(Co) Cobalt	(B) Boron	(I) Iodine
Plus over 40 more elements although not necessarily in elementary form!						

APPLICATION to SOIL and COMPOST

TOP DRESSING: Spread at any time of year unless frozen or windy conditions.

Minimum: 0.5kg / m² (good handful / square yard) = 2tonnes / acre

Booster: 2kg / m² = 8tonnes / acre

MIXING: Mix well with compost / soil at 1 to 2kg per 50Litres of compost. Lower amounts for younger plants. Do not inhale.

PLANT POTS, TUBS, BASKETS: Sprinkle level tablespoonful onto 15cm (6inch) surface diameter of compost or soil and water in as usual. Two applications per year.

WATERING IN: Put 1cm in eg empty 2lt milk container, fill with water. Shake, let settle and water. Refill. Lasts as long as water darkens. Please do not over water!

APPLICATION TO WORMERIES

Sprinkle small handful per 30cm² (1ft²) onto surface of your wormery every month. Try a small area with this amount and see the worms congregate.

APPLICATION FOR COMPOST

Each time you add a new layer of compost to your compost bin or pile, add a light covering over the surface that you can easily see through. Helps gardening material break down into compost faster, reach a higher temperature and reduce odours.

STORAGE AND SAFETY: Store under cover. Do not apply in windy conditions.

450g sachets, 10kg bags, 0.5 tonne, 1 tonne and 28 tonne bulk loads available.
